TECHNICAL AND MARKETING GUIDE

- Very high yield potential
- Good resistance to downy mildew
- Good standing ability
- Early to mature
- Good grain quality
- Ideally suited for the premium export market

SUMMARY

Fuego is an exceptionally high yielding spring bean with a pale skin and pale hilum suitable for the premium export market for human consumption. Agronomically Fuego is sound, combining good standing power with early maturity and good downy mildew resistance. Fuego has excellent quality, producing grain with a high thousand seed weight and a bold grain preferred by the export market.

BREEDER and AGENT

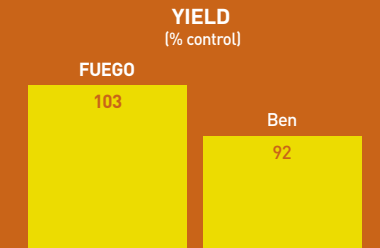

Breeder: NPZ Lembke, Germany

Agent: Nickerson

STATUS

PGRO Recommended List

VERY HIGH YIELDING

Fuego has a very high yield potential and has shown a consistent performance over many seasons.

EXCELLENT AGRONOMIC CHARACTERS

	FUEGO	Ben
Earliness of Ripening	7	8
Shortness of Straw	6	7
Standing Ability at Harvest	7	7

Fuego has a sound combination of agronomic characters being moderately tall with good standing power. It is also relatively early to ripen.

GOOD DISEASE RESISTANCE

	FUEGO	Ben
RESISTANCE TO:		
Downy Mildew	6	4

Fuego has good resistance to downy mildew and is unlikely to need a fungicide treatment in most situations.

GRAIN QUALITY AND MARKETING

	FUEGO	Ben
Thousand Seed Weight (g)	539	502
Protein Content (%)	27.6	26.5

Fuego has a high thousand seed weight and produces a bold looking sample. Its pale skin and pale hilum make it potentially suitable for the premium export market, for samples that are free of staining and insect damage.

All data is from the PGRO Recommended List of spring beans available at www.pgro.org
A high rating figure indicates that the variety shows the character to a high degree.
