NIAB/BBRO RECOMMENDED LIST OF SUGAR BEET VARIETIES FOR 2009

(Based on trials from 2005 - 2007). Control varieties are indicated by [C]. Differences in yields of less than 3% should be treated with reserve.

			Relative Data % of [C]			Juice Quality			Establishment	Agronomic Characters				Disease Resistance		Year First Listed
	Rhizomania	Status	Adjusted Tonnes	Sugar Yield	Root Yield	Sugar Content %	Total Measured Impurities /100g	Amino N (mg/100g)	% Establishment in Trials	Botters per 1000 Plants		Top Size	Crown Height	Rust	Powdery Mildew	
										Early Sowing (4yr mean)	Normal Sowing	1 = Low 9 = High		Resistance 1 = Low 9 = High		
Mean of [C] Varieties			91.6	14.1	79.9	17.6	3.0	78	92	0.9	0.1	6	4	7	6
