

Rampart

Forage Rape bred for feeding quality and grazing flexibility

End Use: Dairy, Beef & Sheep

Utilisation: Graze in situ

Sowing period: Spring, Early Summer & After cereals

Utilisation Period: Autumn & Winter

Double graze rape: Yes

A new generation of forage rape.

Rampart has been bred with feed quality enhancements and with its high yield potential and winter hardiness will enable growers to find extra flexibility when feeding the crops.

Rampart is suitable for both dairy and lamb production and is ready to feed 12-14 weeks after sowing.

Quality Seed – direct from breeder to farmer
