

Alasco

Clubroot resistant variety

Status: Common Catalogue

Type: Restored Hybrid

Clubroot Resistant: Resistant

Clearfield®: No

Resistance Traits: Pod Shatter

Alasco is a clubroot resistant variety that offers very high, stable seed yields; significantly greater than Archimedes or Mentor. The variety has an excellent disease resistance profile combined with the valuable trait of pod shatter resistance.

Clubroot resistant varieties are resistant to the clubroot pathogen. Once receptors in the plant detect a pathogen attack, resistance genes trigger the shutdown of infected cells to block the spread of the disease.

Strengths

- Clubroot resistant
- Very high yields across a wide geographic area
- Strong autumn vigour
- Good disease resistance profile
- High oil content

Quality Seed – direct from breeder to farmer
