

# Aquila

The sky's the limit!

**Type:** Restored Hybrid

**Clubroot Resistant:** Non-Resistant

**Clearfield®:** No

**Resistance Traits:** Pod Shatter & RLM7 (Phoma Resistance)

Aquila offers good gross output potential for the E/W region of the UK. The variety has pod shatter resistance, which is a very important for ensuring good yield stability. Aquila has a very high agronomic merit rating, showing the variety to have a range of desirable agronomic traits for good on farm performance. The variety has very good disease resistance for Light Leaf Spot and excellent resistance for Stem Canker; the two main yield robbing diseases of oilseed rape.

Although an older Hybrid variety, Aquila still shows comparable yield potential compared with other Hybrid Varieties in the East/West regions on the [AHDB RL 2020/21](#). Aquila has a range of desirable agronomic traits for securing full yield potential on farm.

## Strengths

- Excellent disease resistance
- Very good gross output
- High oil content

Quality Seed – direct from breeder to farmer
