

Aspire

Anything but Conventional

Type: Conventional

Status: Recommended UK

Clubroot Resistant: Non-Resistant

Clearfield®: No

Resistance Traits: TuYV (Turnip Yellows Virus)

Aspire offers growers an exceptional conventional oilseed rape with attributes of a very high gross output combined with excellent agronomic characters of short stiff straw and a solid disease resistance profile.

Aspire is the only conventional variety with Turnip Yellows Virus resistance (TuYV) on the [AHDB Recommended List 2020/21](#).

Aspire has shown consistently very high gross output and treated yield potential in fungicide treated trials across regions and differing seasons.

The variety has performed particularly well in the more testing environment of the north.

Aspire has shown a very high Untreated gross output and seed yield (3 year 2017-19) reflecting the varieties strong agronomic package for on farm
