

Nikita

Conventional comparable with hybrids

Type: Conventional

Status: Recommended UK

Clubroot Resistant: Non-Resistant

Clearfield®: No

Nikita is a conventional variety offering yield potential comparable with other older varieties on the AHDB recommended list 2020/21. Since its introduction in 2016 the variety has performed well across the UK and Scotland proving its robustness from a strong agronomic package and consistent high oil content, enabling growers to maximise returns on their rape seed crops.

Nikita has shown high gross output and treated yield potential across both England and Scotland, showing the variety to be resilient across a wide geographical area. Nikita has shown consistent high yield potential across seasons.

Strengths

- High gross output potential
- Strong agronomic package
- 7 for light leaf spot
- Good lodging resistance
- High oil content
