

Gold Circle

4-6 year cutting ley that produces high yields of quality silage with good grazing potential

Use: Cut, Graze & Bale

Mainly used in the North of England, Isle of Man and Ireland, Northern Gold has found a niche in areas where due to higher rainfall, Timothy has predominated in some situations.

Gold Circle is also available without Timothy as Northern Gold and without clover as Bronze Circle.

Strengths

- Reliable and Durable
- Very High Yields
- Top Quality Silage and Hay
- Good Early Spring Growth
- Excellent Animal Performance
- Extended Grazing

Technical Information

Gold Circle contains varieties that are high yielding on the NIAB, SAC and DANI recommended lists and are proven in Nickerson mixture trials.

Top Quality Silage and Hay are achieved by selecting varieties and species with high D value, high levels of sugar, minerals and protein content.

Late Perennial Ryegrass	430 Seeds/m ²

Limagrain

Late Perennial Ryegrass (tet)	85 Seeds/m2
Intermediate Perennial Ryegrass	575 Seeds/m2
Intermediate Perennial Ryegrass (tet)	250 Seeds/m2
Timothy	570 Seeds/m2
White Clover	290 Seeds/m2

Experts Advice

A high seed rate (14kg/acre) and the inclusion of vigorous tetraploids ensures good ground cover, and hence good control of weeds, and maximum yields.

Gold Circle has erect growth for easy cutting and wilting. Can be managed to utilise clover content for optimum grazing output.
