

# Green Circle

## A 2 year intensive silage/grazing mixture

**Use:** Cut, Graze & Bale

**Green Circle is a 2 year intensive silage/grazing mixture.**

Green Circle is also excellent for zero grazing, aftermath grazing and flushing ewes, gives grazing or zero grazing up to 3 weeks earlier than normal leys. This means big savings in feed bills at a time of high milk and meat prices.

Green Circle contains the highest yielding varieties which can produce up to 20 tonnes and more of silage per year, because Green Circle contains perennial ryegrasses it will not thin out in the second year like many straight Italian leys.

### Strengths

- Early Bite
- Very High Yields
- Two Full Years of Production
- High Palatability
- Easy to Ensilage
- Easy to Manage
- Quick Recover
- Resistance to Disease
- Zero Grazing
- Resistant to Poaching
- Rapid Establishment

## Technical Information

As Green Circle contains Perennial Ryegrasses it will not thin out in the second year like many straight Italian Ryegrass Leys. Green Circle contains Tetraploid varieties which are extremely palatable. Maximum intake means maximum production of meat and milk. The use of Italian Ryegrass and Tetraploids, which are extremely high in sugar, ensures rapid fermentation.

Italian Ryegrass	600 Seeds/m <sup>2</sup>
Italian Ryegrass (tet)	260 Seeds/m <sup>2</sup>
Intermediate Perennial Ryegrass	215 Seeds/m <sup>2</sup>
Intermediate Perennial Ryegrass (tet)	290 Seeds/m <sup>2</sup>

## Experts Advice

A high seed rate ensures good ground cover and hence good control of weeds. Green Circle contains aggressive varieties enabling a quick return to production. This is aided by using high germination seed that is treated with fungicide and GPA.
