

# LG30.211

## LG30.211 MAIZE

Highly digestible mainstream variety. Proven in animal feeding trials to increase milk yield by 0.5 litres/cow per day

# LG30.211 MAIZE

## DESCRIPTION

**Type:** Late

**Feed:** Good starch yields

**Yield:** High

## ADVANTAGES

- Reliable yield on maincrop sites
- Reliable performance
- Great value

## RECOMMENDED USAGE

Forage Maize

Anaerobic digestion

Under Plastic

## AGRONOMICS

- LG30.211 is a single cross hybrid with excellent early vigour
- Mainstream maturing silage maize (MC6) suitable for favourable sites
- LG30.211 is officially recommended for use under plastic cover by DAFM in Ireland

## FEEDING

LGAN Accredited

- Very high starch and ME yields
- Improved cell wall digestibility for improved animal performance

## YIELD

- Top performing variety in Holland, Belgium and Denmark
- Excellent dry matter yields

Limagrain fitcon data: 2008-16 trials

MATURITY CLASS

6 (FAO 210)
